reSTORE DC helps revitalize neighborhood business districts and small businesses in DC by assisting community organizations with the promotion of neighborhood business corridors, improvement of the appearance and economic health of these corridors and strengthening the capacity of small businesses and neighborhood revitalization organizations.

reSTORE DC assists neighborhood business districts through the **DC Main Streets** program and the **Commercial District Technical Assistance Program (CD-TAP)**. The **Enhanced Business Information Center (e-BIC)** provides entrepreneurs with training, workshops, consulting and access to today's leading computer software.

The **DC Main Streets** program was created in 2002 to support the revitalization of DC's traditional neighborhood business districts through a comprehensive, community-organized approach to economic development. This approach is based on a nationally proven model developed by the National Trust for Historic Preservation.
